Allowing satellite radio to broadcast instant traffic reports i believe is beneficial to the economy. It helps us get to work on time by letting us know what routes to avoid. Getting to work on time obviously allows people to get more work done. I love the fact that i don't have to wait for the radio announcer to come on after 10 minutes of commercials to finally tell me whats going on with traffic. Satellite radio is wonderful because you can get the information within a minute or two on any congestion on the beltway. My friends and I are surprised that this is even an issue. How can you ban something that helps people plan their day better?!?!? And we also pay for this service!!
